## *To all Lovers of Flowers!*

FALL, 1946

A beautiful garden, like FREEDOM, is appreciated most when taken away. Now freedom has returned to Holland, and the bulbs that have been sadly lacking since the war began are again available to give fresh beauty to your next Spring's garden. The garden which attains its climax of beauty in spring when the first warm sunrays gladden our hearts and cause new life to spring from the apparent dead earth, the new life all people so greatly long for.

Visualize, if you will, another drab winter suddenly broken by the earliest Heralds of Spring—Snowdrops and Winter Aconites—which appear even before the snow has disappeared, followed soon by Crocus, Daffodils, Hyacinths, and gradually Tulips and other bulb flowers follow in May with a burst of glory to celebrate their triumph of new life, beauty, and color.

**NOW IS THE TIME TO PLANT.** Spring-flowering bulbs must be planted in the Fall. By following simple instructions, the planting requires very little work. After planting the bulbs need no further attention to display their beauty in Spring.

This season we supply again the genuine Holland bulbs direct from our own large farms in Holland.

Genuine Holland bulbs are the best in the world, for reason that each bulb is planted by hand, dug by hand, and further treated by hand. No machines of any kind are used on the Holland bulb farms, all the work is done by hand, as it has been done in the past hundred years or more.

For centuries the Hollanders have cultivated flower bulbs, and continually they have amazed the world by the new acquisitions of varieties, the possession of which is a delight to every flower-lover.

The creation of these novelties has been made possible only by individual effort and individual love for the profession. The professional men in Holland never allowed themselves to rest during the hard years of war, and thus are now able to surpass all expectations of a flower-loving world.

The best that the Holland bulb growers can produce in new as well as in old varieties is offered to you in this catalog. It is up to you to avail yourself of this opportunity.

## *The Incomparable Narcissus "Deanna Durbin"*

As an old bulb grower and his wife were sitting in their home alone one evening listening to the radio, suddenly they heard the "Ave Maria." Both sat silent, as the lovely voice interpreted this old song. Both felt deeply impressed by its beauty, and then the old man said to his wife: "I feel that I would like to name my new Narcissus for this singer, for surely the name of one who can so beautifully interpret the "Ave Maria" is worthy to represent the beauty and purity of my new Narcissus." Thus it happened that a Narcissus—the crowning achievement of the lifetime work of an old

man was called "Deanna Durbin." You will find the flowers illustrated on the preceding page. This flower is not only perfect in shape and pronounced in color, but it also excels in fine dark foliage and vigorous growth. Equally lovely and desirable for house and garden. Only a limited quantity of this novelty is cultivated, therefore we must limit sales to 12 to a customer.

## Daffodils and Narcissi in Popular Varieties

Below you will find the best of the reliable varieties as of old, most of which have adorned your border, and have made sunshine in your garden with their brilliant colors and tints even during gloomy weather and overcast skies. Among the Trumpet Daffodils, King Alfred is the most popular and

it goes without saying that it is a first-rate variety, but the later varieties—such as Golden Harvest and Rembrandt—are really finer and better. Buy them too. All of them suitable for indoor culture, and make beautiful cut flowers.

## Daffodils and Narcissi for Naturalizing

Planted in masses on the lawn, in front of shrubs, along lake and pond borders, these charming flowers make an incomparable scene. They bring color and life to the entire surroundings. No bulb product lends itself better to forming a natural scene than the fiery tinted, rich-flowering

and sublimely shaped Daffodils. This sort of planting, entrusted to nature, requires no further care and for many years these Narcissi and Daffodils return in ever greater numbers. Although reasonably priced, first-class quality and varieties are guaranteed.

## Narcissi for Naturalizing

As a brilliant carpet of silver and gold, the Daffodils and Narcissi form a sunny landscape. The diversity in shape and color makes this mixture exceedingly interesting. Early and late flowering varieties with trumpets and short cups in all shades of white, yellow and orange, alternate in varie-

gated diversity. Also especially recommended for cut flowers.

## Christmas Hyacinths

Flowers in the home are especially welcome at Christmas time, but even more so when you produce them yourself. We have treated these Hyacinths so that they will bloom indoors without any trouble at Christmas. For a

few weeks in mid-winter you can enjoy the magnificent flowers and delightful fragrance of springtime. They should be planted in September—to plant them later will result in later blooming. Also suitable for glasses.

## Magnificent New Long-Stemmed Darwin Tulips

### "Aristocrat"

There are very few varieties bearing a name which expresses the true value and quality of the variety. "Aristocrat" is a magnificent new Darwin Tulip, rightfully entitled because it is a real aristocrat. The flower, color, stem, and erect royal appearance make this Tulip a first among all competitors. The tall strong stem carries the unusually large flower of extremely elegant shape and substance. The color is silvery-rose, shading into carmine-rose toward the center. Exceptionally fine for lawns, borders and groups, and will also bloom in the house toward the end of March. "Aristocrat", the aristocrat among the Darwin Tulips, 25 for \$6.20; 3 for \$0.90 **12 for \$3.25**

### New Varieties

The majority of the new varieties have come into existence by crossing. However, occasionally, attentive growers find extra large flowering specimens of splendid deviation in color. These specimens are kept apart and have sprung. Below are three new varieties acquired in this way.

**American Flag.** Springs from the celebrated Darwin Tulip "Bartigon." The large, bowl-shaped flower is evenly cerise-red, marked on bright white background ... \$13.70 \$2.—

This offer is very profitable for you and necessary for us, because nature affects the number of each variety harvested. Of one variety we have too many, whereas of another we have too few. This offer takes care of the balance. You order a fiery red Darwin; we have many varieties in this color, but which one you get we only know after the harvest and after

deduction of those ordered by name. Therefore, if you are interested in the color but not the name, we make this inexpensive offer which will make your May garden a pleasure garden. Of course we supply only one variety for each color you specify, so that you will be assured of simultaneous and equable flowering.

## Traditional Cottage Tulips

This race, which is two centuries old, has made history and is connected with the tradition of Holland. The wealthy Dutch families in the 18th century owned summer cottages in addition to their city dwellings. The gardens of these cottages were planted with Tulips which bloomed only in May when the families moved to the country. Thence they were named

Cottage Tulips. They have been improved through the years and are still popular today for garden planting. They bloom in May, have tall erect stems, and the flowers are distinguished by their slender elegant shape. The varieties listed below are acquisitions of the last years and are in every respect improvements over the earlier varieties.

**Argo.** A very peculiar Tulip, deep golden-yellow, spotted and flamed with orange; when fading the flower becomes a bronze red ... 100 for 12 for \$9.30 \$1.35  
**Belle Jaune.** Very beautiful oval-shaped flower, warm golden-yellow, inside lemon-yellow; strong tall stem, brilliant novelty

## Long-Stemmed Double Late Tulips

By crossing Double Early Tulips with Darwins we have succeeded in developing a new race with gigantic, completely filled flowers on tall strong stems. For lawns, borders and groups they have unsurpassable beauty.

Planted close together the enormous flowers cover the entire spot where they are standing. It goes without saying that they are also excellent for cut flowers.

## Parrot Tulip "Fantasy"

We feel that this is a happily chosen name because only in fantasy could one really expect such a Tulip to exist. The robust stem carries the gigantic, capriciously striped flower, whereas the edges of the prettily arched and waved petals are whimsically carved and fringed. A brilliant array of colors is united in these famous Tulips. The warm satin-rose tint is contrastingly broken by fine, silvery-white and green shades. Unsurpassed for small lawns and groups, also this sublime variety is very suitable for cut flowers. 100 for \$10.00; 12 for \$1.55;

## Well-known Parrot Tulips as of Old

These are the widely known varieties which need no further introduction. For several years they have stood the test in many gardens, as their splendid colors certainly match those of the newer varieties. Their stems, however,

are less strong, and occasionally in bad weather the flower proves too heavy. They are distinguished by their massive, waved and fringed flowers, and many people would not do without them in their gardens.

## The Tulip Wonder "Red Emperor"

This is the very largest size Tulip ever cultivated. The tremendous big flower is carried on a robust strong stem, holding it firm and erect. The color is of just about the most brilliant scarlet one can imagine, and of such an intensity that the effect is almost blinding. The rich color becomes conspicuous, interrupted at the inside by a strikingly colored base. Furthermore a very attractive quality of this famous Tulip is the fact that it blooms very early. A small group of three in a border or in the rock garden will contrast brilliantly against a green background. 25 for \$5.10; 3 for \$0.75;

**12 for \$2.70**

## Botanical or Wild Tulips

This race of Tulips originates from the mountainous regions of Eastern Asia, where they, like our Daisies, grow wild. It is for that reason that they give the best of satisfaction when planted in the rock-garden, where they can remain for several years and will bloom more beautifully every year.

Even if they have practically been overgrown by other plants, it will not be detrimental to their flowering capacities. When planted in borders and small groups in front of bushes, they produce a startling effect. These botanical or wild Tulips are noted for their early blooming.

## Crocus for the Garden

Where flowers blossom there is joy of living. We enjoy especially the first spring flowers after a long winter. Every flower lover knows that the Crocus—often called the harbinger of spring—takes a prominent place. From the humble, wild little alpine flowers, large flowered Crocus have

been developed in the course of years. The flowers of these Crocus are large and strong and remain erect until the end of the flowering season. They have a most pleasing effect in flower beds, groups, borders, rock gardens and window boxes.

## Inexpensive Offer for Naturalizing

These bulbs are somewhat smaller but produce the large flowered improved Crocus in the colors mentioned below. They do not flower so abundantly the first year as the large bulbs of the named varieties, but are popular in livelier aspect your garden

large quantities, as they are very reasonably priced. They grow into larger bulbs with you instead of with us. Once planted, they flower more abundantly every year, and the more that are planted the prettier and will show in the spring.

## Wonderful new *Scilla campanulata*

Doubtless you are familiar with the common Blue Bells, but when you see the new *Scilla campanulata* you will hardly believe that these spring from the common Blue Bell. The heavy pyramid-shaped trusses carry more than 50 strong flower bells; the stems are very stiff and about 30-40 c.m. high;

## *Lilium candidum*

Produces snow-white flowers on stout stems four feet tall. Delightfully fragrant. They may be left in the ground undisturbed for years and will develop into huge plants, producing many stems and countless flowers. They grow best between and in front of bushes and shrubs. Do very well in small groups along garden paths and in borders. Also ideal for indoor culture.

## Scilla "Spring Beauty"

A new variety, distinguished by its heavy well-filled spikes of deep blue, strong bell-shaped flowers: Recommended for every garden, also ideal for indoor culture. See colored illustration on page 25.

100 for \$6.10;

12 for \$— .90;

25 for \$1.65

## Eranthis hiemalis (Winter Aconites)

When nature is still in its winter-sleep, they are beginning to bloom. They form a wreath of green leaves, above which the golden yellow flowers rise in great numbers. They should be left undisturbed and the quantity of flowers will increase each year. See illustration on page 29.

100 for \$2.90;

12 for \$— .45;

25 for \$— .80

## Chionodoxa Luciliae

Although very often there is still snow and cold, they will flower in early Spring with an abundance of pretty, star-shaped, lively blue flowers with white centre. They can be left undisturbed for years and will increase rapidly. See illustration on page 25.

100 for \$2.10;

12 for \$— .35;

25 for \$— .60

## Fritillaria meleagris

Each stem carries a number of gracefully shaped pendulous flowers, partially white, partially purplish brown with grey blotches. They flower for a long period, are beautiful cut flowers and may be left undisturbed for years thus increasing their flowering qualities. See illustration on page 29.

100 for \$2.70;

12 for \$— .40;

25 for \$— .75

## Single Snowdrops (Galanthus nivalis)

They give a lovely effect in groups and edgings, in bunches on the lawn and the rock-garden, beneath shrubbery and along the edge of a pond. Plant them closely together and leave them undisturbed for years. Also suitable for indoor culture. They cannot stand artificial heat very well. See illustration on page 29.

100 for \$5.70;

12 for \$— .85;

25 for \$1.55

## Double Snowdrops (Galanthus nivalis fl. pl.)

The difference between the Single and the Double Snowdrops is that the cups of the latter are filled with small soft petals. They flower later than the Single variety and are suitable for garden and indoors.

100 for \$6.90;

12 for \$1.05;

25 for \$1.90

## "The Picturesque Flowering Rock-Garden"

Nowadays the rock garden is the center of interest, and with a little care and judgment it is possible to have flowers blooming continuously in the rock garden from early spring until late autumn. Besides the small shrubs

which take care of the permanent growth, it is essential to plant a number of groups of flowering bulbs which give the garden a picturesque appearance in early spring. This collection is fine for borders and contains

10 Tulipa "Eichleri"  
10 Tulipa "Kaufmanniana Elliott"
